

Environmental Policy

It is CROSCO's policy to achieve a high standard of the environmental care in conducting its business as a Drilling & Well Services company contributing to society's need and expectations.

It is CROSCO's policy to:

- Comply with all applicable laws, regulations and apply standards that minimize any adverse environmental impacts resulting from its operations;
- Constantly improve the environmental protection management system;
- Communicate openly with institutions and community on the environmental issues, and contribute to the development of national policy, legislation and regulations that may affect environmental aspects connected with CROSCO's operation;
- Ensure that its employees and suppliers of goods and services are acquainted with this policy and aware of their environmental responsibilities in relation to CROSCO's business;
- Ensure that CROSCO's HSE Management System is adequate for identification, control and monitoring of environmental risks arising from its operations, and for preventing pollution of any kind;
- Establish programs to conserve natural resources in compliance with the principles of sustainable development and to minimize produced waste quantities, including separate collection of usable waste for recycling.
