

Coil Tubing & Nitrogen Services

CROSCO's Coil Tubing Services are provided onshore and offshore with trailer or skid mounted coil tubing units and highly trained and experienced personnel. Reeled tubing size varies from 25,4 mm (1 inch) to 38,1 mm (1 1/2 inch). Units with larger reeled tubing size can be made available. In combination with coil tubing downhole tools a wide array of wellbore applications can be performed including:

- well lifting/killing
- drilling/milling
- fishing
- stimulation
- cementing

CROSCO was among the first contractors that offered coil tubing services in Europe in 1975.

Coil Tubing Units:

- Bowen MB30
- Bowen MX12
- Bowen MZ15
- MH100

CROSCO Nitrogen service operates onshore and offshore with automated units and lightweight offshore skids. Units are mostly used for well applications to reduce the weight of fluid in the wellbore and for nitrogen purging of pipelines and tanks. But unique properties of liquid and gaseous nitrogen offer a wide range of capabilities in oil, gas and petrochemical industries.

CROSCO can offer six Air Liquide storage tanks of 7.500 liters (1.981 gallons).

Nitrogen Units:

- Hobbs
- Skid I
- Skid II
- Kenworth
